

# ABSTRACT

A curable rubber composition comprising a curable  
5 organopolysiloxane or perfluoropolyether group-containing  
organosilicon compound, a curing agent, and a silica filler  
having a mean particle size of 0.001-10  $\mu\text{m}$  is cured into a  
cured rubber. For improving compression set, the cured  
rubber is post treated with a hydrolyzable aminosilane or  
10 amidosilane having a Si-N bond in vapor form.
